

LEUNG WAI LIU

New York, NY | 917-930-5678 | leungwai@wustl.edu | linkedin.com/in/leungwailiu | github.com/leungwai

Technical Skills

Processes and Tools: Agile/Scrum, CI/CD, Azure DevOps, Git

Programming: Java, C++, C, Python, Swift/SwiftUI, HTML/CSS, R, Firebase, SQL

QA & Testing: Manual, Regression, Functional, End-to-End, Network (Fiddler, Postman), Performance (JMeter, LoadRunner), Accessibility (WAVE, ANDI, Accessibility Insights), Automation (Subject7, Selenium)

Professional Experience

Workforce Systems and Data Analyst

10/2025 to Present

NYC Department of Youth and Community Development (DYCD)

New York, NY

- Serve as the primary liaison to an external software vendor, translating requirements and coordinating enhancements while resolving data issues and partnering with our internal IT development teams to implement system improvements for our portfolio of applications that serve 110,000+ participants
- Direct Workforce application redesigns, developing Figma mockups and providing CSS guidance to deliver intuitive, visually consistent interfaces

IT Systems and Quality Assurance Analyst

07/2024 to 09/2025

NYC Department of Youth and Community Development (DYCD)

New York, NY

- Established a robust QA foundation for a newly-formed team at DYCD by creating streamlined processes and cross-functional workflows aligned with Agile methodologies and CI/CD best practices
- Spearheaded the agency transition from manual to automated testing by evaluating vendors through designing modular test scripts and presenting proof of concept to agency leadership to assess maintainability and scalability
- Led the migration of Dynamics 365 from On-Prem to Online by developing a comprehensive test plan, organizing 1,200+ test cases, executing 270+ test cases, and providing guidance to the QA team to ensure full test coverage within a 2-month timeline
- Developed and executed 300+ end-to-end regression test cases across DYCD's web and Dynamics 365 applications to ensure release readiness and functional integrity
- Diagnosed and resolved 50+ production issues by debugging .NET and AngularJS code, querying SQL databases through SSMS, collaborating with stakeholders, and documenting detailed bugs in Azure DevOps to support timely resolution
- Enhanced performance and scalability of DYCD applications by collaborating with NYC Office of Technology and Innovation, guiding testers, capturing HTTPS traffic with Fiddler, and creating/troubleshooting JMeter and LoadRunner scripts for accurate load simulations
- Designed and implemented Azure DevOps dashboards to track QA progress and project milestones, enhancing communication across cross-disciplinary teams and enabling data-driven decision-making

AI Research Intern

06/2022 to 08/2022

JPMorgan Chase & Co. (JPMC)

New York, NY

- Secured top positions in 3 tasks of the Social Media Mining for Health NLP competition hosted by the Penn Institute for Biomedical Informatics and published 2 system descriptions focusing on the BERT language model optimizations for the competition
- Improved Named Entity Recognition (NER) accuracy on Tweebank Twitter datasets by 13.9% through Python scripting, SpaCy, and manual review, enhancing annotation precision and streamlining data processing for language model training
- Crafted a comprehensive beginner's guide on the BERT language model and questions for JPMC's existing AI and ML videos to enhance the learning experience for 240,000+ employees

Education

Bachelor of Science: Computer Science (GPA: 3.48/4.0)

05/2023

McKelvey School of Engineering, Washington University in St. Louis

St. Louis, MO

- **Awards:** Dean's List (Fall 2019 Semester, Spring 2021 Semester)
- **Extracurriculars:** President, Hong Kong Students Association
